

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable. I know I will drop all services and just deal with life another way.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. For the simple fact they have the money already. They are just too lazy to spend it. That just really makes me disgusted. I don't make much and I urge you to reject the proposal to move the USF collection system to a flat-fee. Everyone wants to tax something and it's not fair.

Keep the USF Fair!

Sincerely,

Joe Wagner
